Each year, since 1947, it has been a Thanksgiving tradition in the U.S. to present the President with a turkey in an official ceremony at the White House. Ronald Reagan was the first President to officially "pardon" the White House turkey. These special turkeys are carefully selected and generally weigh around \_\_\_\_\_ pounds. Find out the weight by doing some math. If A = 1, B = 2, C = 3, and D = 4, determine the total score of all correct answers and complete this equation:

$$\frac{\text{TOTAL SCORE}}{\text{TOTAL SCORE}} + 15 = \frac{\text{AVE. TURKEY WEIGHT}}{\text{AVE. TURKEY WEIGHT}} \text{ lbs.}$$
